UC Santa Barbara's Research Mentorship Program, which enables talented high school students to jump start their college careers, will be held this summer from June 20 through July 29.

In this extraordinary six-week residential program, qualified students take two courses for university credit and conduct research under the tutelage of top researchers in departments as diverse as the arts and music, the humanities, social sciences, sciences, and engineering.

At the end of the session students present their research findings in a colloquium that is open to the public.

"Students who have participated in the Research Mentorship Program at UCSB have found it to be a life-changing experience, especially for those who came on full scholarships," said Miriam Polne-Fuller, a research biologist in UCSB's Marine Science Institute, who directs the program.
Applications must be submitted to UCSB's Summer Sessions Office by May 27.

Students are required to have a minimum grade point average of 3.3, two letters of recommendation, and other supporting materials.

For more information, call (805) 893-8950.

Participants live in campus residence halls or commute to UCSB daily. The cost for the Research Mentorship Program is $6,198, which includes tuition, housing, three daily meals, and extracurricular activities. For commuting students the cost is $2,700. Scholarships are available for financially qualified students.

About UC Santa Barbara

The University of California, Santa Barbara is a leading research institution that also provides a comprehensive liberal arts learning experience. Our academic community of faculty, students, and staff is characterized by a culture of interdisciplinary collaboration that is responsive to the needs of our multicultural and global society. All of this takes place within a living and learning environment like no other, as we draw inspiration from the beauty and resources of our extraordinary location at the edge of the Pacific Ocean.
