## **UCSB Ranked No. 29 in World University Rankings**

UC Santa Barbara has been ranked number 29 in a list of the world's top 200 universities released today by Times Higher Education, a British periodical.

"We would like to congratulate University of California, Santa Barbara for its performance in this year's rigorous rankings," Ann Mroz, editor of Times Higher Education, said. "Being ranked 29 in the world top 200 is an impressive achievement. The top 200 universities in the world represent only a tiny fraction of world higher education and any institution that makes it into this table is truly world-class."

The 2010-11 World University Rankings used a new methodology developed with data supplied by Thomson Reuters. The rankings place less importance on reputation and heritage than in previous years, and give more weight to hard measures of excellence in all three core elements of a university's mission -- research, teaching, and knowledge transfer.

The rankings include 13 separate performance indicators, across five categories: teaching, research, citation impact, industry income, and international mix. UCSB's overall score in the rankings was 75, with scores of 58.6 in teaching, 68 in research, 98.8 in citation impact, 89.8 in industry income, and 64.3 in international mix.

## **About UC Santa Barbara**

The University of California, Santa Barbara is a leading research institution that also provides a comprehensive liberal arts learning experience. Our academic community of faculty, students, and staff is characterized by a culture of interdisciplinary collaboration that is responsive to the needs of our multicultural and global society. All of this takes place within a living and learning environment like no other, as we draw inspiration from the beauty and resources of our extraordinary location at the edge of the Pacific Ocean.
